Chi siamo | Who we are

L'AZIENDA
THE COMPANY

La nostra storia •

HOTFORM inizia la sua lunga esperienza nel 1976 a Onara di Tombolo, non lontano da Padova nel Veneto orientale. Queste sono le radici e le origini di una storia che, da oltre 40 anni, racconta di un'azienda prestigiosa e leader nello stampaggio di materiali termoplastici (PET, OPS, PP) per la produzione di contenitori nel settore alimentare.

L'evoluzione •

Nel 2011 viene inaugurata la nuova sede a Tombolo. Uno stabilimento all'avanguardia, disposto su di una superficie di 16.000 mq², ubicato a pochi centinaia di metri dalla struttura precedente.

Un cambio di passo •

Nel 2018 una svolta importante: l'azienda cambia proprietà e una nuova realtà aziendale rileva **HOTFORM**. Una direzione generale giovane e dinamica, viene affiancata da una struttura manageriale e da un team di collaboratori d'esperienza. L'evoluzione avviene naturalmente quando al centro ci sono voglia e capacità, competenze, esperienze, passione e amore per il proprio prodotto.

Our history •

HOTFORM began its long experience in 1976 at Onara di Tombolo, not far from Padua in the Eastern Veneto, North East of Italy. These are the roots and origins of a story that, for over 40 years, tells of a prestigious company and industry leader in the moulding of thermoplastic materials (PET, OPS, PP) for the production of containers in the food sector.

The evolution •

In 2011 the new plant in Tombolo is inaugurated. A state-of-the-art facility, covering a surface of 16.000 sq.m, very close to the previous premises.

A change of pace •

In 2018 an important turning point: the company changes ownership and a new managerial reality takes over **HOTFORM**. A young and dynamic general management is flanked by a managerial structure and a team of experienced collaborators. The evolution takes place naturally when at the centre there is desire and ability, skills, experiences, passion and love for what we produce.

Cosa facciamo | *What we do*

Un sistema a Loop chiuso: estrusione •

Negli ultimi anni ci siamo specializzati nell'estrusione di PET. Disponiamo di un impianto con due estrusori che consentono di soddisfare il fabbisogno di autoconsumo interno. È un sistema di Loop chiuso, un modello virtuoso di riutilizzo degli sfridi di produzione e post consumo che vengono lavorati nuovamente con l'aggiunta di materiale vergine. Un processo per valorizzare le risorse e azzerare i rifiuti.

A closed Loop system: extrusion •

In recent years we specialized in the extrusion of PET. We have a plant with two extruders that satisfy our consumption needs. It is a circular system, a virtuous model for recycling the scraps of production and post consumer that are processed again with the addition of virgin material. A process for enhancing the resources, eliminating the waste.

La progettazione e la realizzazione degli stampi •

HOTFORM produce una gamma di prodotti standard e su commessa. Per entrambi progettiamo e costruiamo internamente gli stampi, curandone nella nostra officina meccanica, anche la manutenzione periodica. Attraverso gli stampi su commessa rendiamo concreti i bisogni della nostra clientela e ne accompagniamo la crescita e lo sviluppo industriale.

Mould design and production •

***HOTFORM** produces a range of standard and bespoke products. For both we design and build the moulds internally in our workshop and we make the periodic maintenance too. Through the customised moulds we meet our customers needs concretizing their ideas and accompanying their growth and industrial development.*

Il processo produttivo: termoformatura •

HOTFORM ha un processo produttivo di termoformatura all'avanguardia ed organizzato secondo gli schemi di certificazione ISO 9001:2015 e BRC PACKAGING, entrambi rilasciati dal prestigioso ente di certificazione DNV GL. Gli imballi di colore bianco con il logo aziendale contraddistinguono la nostra produzione e rappresentano un biglietto da visita per identificare un prodotto di qualità certificata. L'utilizzo della più moderna robotica e linee altamente automatizzate, con un magazzino prodotto finito sempre disponibile, proiettano già l'azienda nel mondo dell'industria 4.0.

The production process: thermoforming •

***HOTFORM** has a highly technological thermoforming production process and is according to the ISO 9001: 2015 and BRC PACKAGING certification schemes, both issued by the prestigious DNV GL certification body. The white carton boxes with our company logo distinguishes our production and represents a business card to identify a certified quality product. The use of the most modern robotics and highly automated lines and warehouse, where goods are always available on stock, are already projecting the company into the world of industry 4.0.*

I mercati serviti •

Da molti anni siamo apprezzati all'estero: serviamo oggi 43 paesi diversi sia nell'area UE e in quella extra UE. Consolidata è anche la presenza sul mercato nazionale, sia nell'industria che nella distribuzione tradizionale e organizzata.

The markets served •

We have been appreciated abroad for many years: today we serve 43 different countries both in the EU area and in the extra EU one. The presence on the national market is also consolidated, both in the industry and in traditional and organized distribution.

I nostri prodotti sono conformi al D. Lgs. 116 del 3 Settembre 2020 (etichettatura ambientale degli imballaggi) che recepisce la Direttiva (UE) 2018/851 sui rifiuti e la Direttiva (UE) 2018/852 relativa agli imballaggi ed ai rifiuti di imballaggio per facilitarne lo smaltimento, il recupero e il riciclaggio.

Our products comply with Legislative Decree 116 of 3 September 2020 (environmental labelling of packaging) which transposes Directive (EU) 2018/851 on waste and Directive (EU) 2018/852 on packaging and packaging waste for facilitate their disposal, recovery and recycling.

Produzione di PET | PET production

HOTFORM da molti anni si è impegnata a produrre secondo una economia circolare sostenibile come formulato dalle direttive europee. Per questo motivo abbiamo scelto di produrre lastra in PET, materiale pregiato, riciclabile al 100% ed all'infinito.

HOTFORM has been committed for many years to produce according to a sustainable circular economy as formulated by European directives. For this reason we have chosen to produce PET sheets, which is a precious material, 100% and infinity recyclable.

ECONOMIA CIRCOLARE

- è un modello di produzione e consumo
- estende il ciclo di vita dei prodotti
- riduce i rifiuti al minimo
- genera dal processo ulteriori valori

CIRCULAR ECONOMY

- is a model of production and consumption
- extends the products life cycle
- reduces waste to a minimum
- generates further values from the process

Utilizziamo il **5%** di PET vergine che a contatto con gli alimenti funge da "**barriera funzionale**" compatibile con i requisiti dell'art.13 "Materiali e oggetti di plastica multistrato", paragrafi 2-3-4-5 del Reg.10/2011.

*We use **5%** virgin PET which in contact with food acts as a "**functional barrier**" compatible with the requirements of article 13 "Multilayer plastic materials and objects", paragraphs 2-3-4-5 of Reg.10/2011.*

L'azienda è in grado di fornire prodotti **100% R-PET FOOD GRADE**, idonei al contatto diretto con gli alimenti, grazie all'utilizzo di materie prime derivanti da processo di decontaminazione autorizzato dall'autorità per la sicurezza alimentare europea EFSA.

*The company is able to supply **100% R-PET FOOD GRADE** products, suitable for direct contact with food, thanks to the use of raw materials coming from the decontamination process authorized by the European food safety authority EFSA.*

Le Certificazioni The Certifications

Le Certificazioni Aziendali **HOTFORM** sono un titolo di riconoscimento che attesta la creazione, l'applicazione ed il mantenimento di un Sistema Gestionale ed Organizzativo di Qualità che da sempre **HOTFORM** ha perseguito con lo scopo di raggiungere l'efficacia e l'efficienza nella politica della Qualità/Ambiente/Sicurezza.

The **HOTFORM** Company Certifications are an acknowledgement that certifies the creation, application and maintenance of a Quality Management and Organizational System that **HOTFORM** has always pursued with the aim of achieving effectiveness and efficiency in the Quality/Environment/Safety policy.

La certificazione volontaria **BRC** è un requisito essenziale per tutelare la salute dei consumatori e la salubrità dei contenitori destinati al confezionamento di alimenti. Basata sullo **standard globale BRCGS** è uno strumento operativo che pone le sue basi nel metodo **HACCP** (Hazard Analysis and Critical Control Points) ed è finalizzato a dimostrare che sono state prese tutte le misure necessarie per evitare un incidente o un danno e per selezionare fornitori qualificati.

Questo approccio consente di ridurre i costi complessivi di gestione della supply chain e contemporaneamente accresce il livello di sicurezza per consumatori, clienti e fornitori.

Per le aziende che già applicano un sistema di gestione per la qualità secondo le **ISO 9001** o utilizzano la metodologia HACCP, la conformità a questi standard risulta molto agevole, con la possibilità di sfruttare le sinergie e gli elementi in comune tra i diversi schemi.

The voluntary **BRC** certification is an essential requirement to protect the health of consumers and the healthiness of containers designated for food packaging.

Based on the **BRCGS global standard**, it's an operational tool that lays its foundations on the **HACCP** method (Hazard Analysis and Critical Control Points) and is aimed at demonstrating that all necessary measures have been taken to avoid an accident or damage and to select qualified suppliers.

This approach reduces the overall costs of managing the supply chain and at the same time increases the level of security for consumers, customers and suppliers.

For companies that already apply a quality management system according to **ISO 9001** or use the HACCP methodology, compliance with these standards is very easy, with the possibility of exploiting the synergies and elements in common between the different schemes.

AZIENDA CON SISTEMA DI GESTIONE QUALITÀ CERTIFICATO DA DNV GL.
COMPANY WITH QUALITY MANAGEMENT SYSTEM CERTIFIED BY DNV GL.
= ISO 9001 = ISO 14001 =

La **ISO 9001** contiene i requisiti per progettare, implementare e mantenere nel tempo un Sistema di Gestione per la Qualità. Il modello ISO 9001 rappresenta uno strumento strategico per valutare il contesto e le parti interessate, analizzare i rischi e le opportunità per definire opportune azioni, controllare i costi, aumentare la produttività e ridurre gli sprechi.

La **ISO 14001** contiene i requisiti per progettare, implementare e mantenere nel tempo un Sistema di Gestione per l'Ambiente. Il modello ISO 14001 rappresenta uno strumento strategico per tenere sotto controllo gli impatti ambientali delle proprie attività, e ne ricerca sistematicamente il miglioramento in modo coerente, efficace e soprattutto sostenibile.

Il Sistema Qualità di **HOTFORM** è garantito dalle due certificazioni e verificato da **DNV GL** quale ente terzo.

ISO 9001 contains the requirements for designing, implementing and maintaining a Quality Management System over time. The ISO 9001 model represents a strategic tool for assessing the context and involved parts, analysing risks and opportunities to define appropriate actions, control costs, increase productivity and reduce waste.

ISO 14001 contains the requirements for designing, implementing and maintaining an Environmental Management System over time. The ISO 14001 model represents a strategic tool for keeping the environmental impacts of one's activities under control, and systematically seeks improvement in a coherent, effective and above all sustainable way.

HOTFORM's Quality System is guaranteed by the two certifications and verified by **DNV GL** as a third party.

I Materiali The Materials

| MATERIALE MATERIAL | TEMPERATURA DI UTILIZZO OPERATING TEMPERATURE | IDONEO AI PROCESSI SUITABLE TO PROCESS |
|-----------------------|--|---|

| PP | -20 °C / +130 °C | |
| PS/OPS/PST | -5 °C / +80 °C | / |
| PP-EVOH-PP | -20 °C / +130 °C | |
| PET+PE+PEL | -20 °C / +60 °C | |
| PST+PE+PEL | -5 °C / +80 °C | / |

O = ALTRI MATERIALI / OTHERS MATERIALS

/ = NO CONGELAMENTO, NO MICROONDE / NO FREEZE, NO MICROWAVE

PET - Polietilene tereftalato: resina termoplastica atossica adatta al contatto alimentare, che per le sue caratteristiche di trasparenza, resistenza e barriera ai gas è particolarmente adatta alla produzione di contenitori e bottiglie.
PET - Polyethylene terephthalate: non-toxic thermoplastic resin suitable for food contact, which due to its characteristics of transparency, resistance and gas barrier is particularly suitable for the production of containers and bottles.

PET+PE+PEL - Multistrato che oltre alle caratteristiche del PET unisce quelle del PE con ottimi valori di sigillabilità e di barriera al vapore acqueo.
PET+PE+PEL - Multilayer that, in addition to the characteristics of PET, combines those of PE with excellent sealability and steam barrier.

PP - Polipropilene: polimero termoplastico atossico (assenza rischi di contaminazione per la salute dei consumatori), non modifica o altera in maniera sensibile la composizione degli alimenti e non ne varia le caratteristiche organolettiche.
PP - Polypropylene: non-toxic thermoplastic polymer (no risk of contamination for the health of consumers), does not change or significantly alter the composition of food and does not change its organoleptic characteristics.

PS/OPS - Polistirene o polistirolo/polistirolo orientato: polimero termoplastico atossico idoneo al contatto alimentare, isolante e resistente all'umidità e al sale. Si presta bene alla trasformazione in vaschette.
PS/OPS - Polystyrene or polystyrene/polystyrene oriented: non-toxic thermoplastic polymer suitable for food contact, insulating and resistant to humidity and salt. It lends itself well to transformation into trays.

PP-EVOH-PP - Polipropilene e internamente un copolimero dell'alcol vinilico (EVOH). Lo strato interno aumenta sensibilmente la barriera ai gas.
PP-EVOH-PP - Polypropylene and internally a copolymer of vinyl alcohol (EVOH). The inner layer significantly increases the gas barrier.

PST+PE+PEL - Multistrato di polistirolo e polietilene (PE). Ha maggiore resistenza chimica, in particolare verso i grassi.
PST+PE+PEL - Polystyrene and polyethylene (PE) multilayer. It has more chemical resistance, particularly to fats.

PET – Polietilene tereftalato: resina termoplastica atossica adatta al contatto alimentare, che per le sue caratteristiche di trasparenza, resistenza e barriera ai gas è particolarmente adatta alla produzione di contenitori e bottiglie.
PET – Polyethylene terephthalate: non-toxic thermoplastic resin suitable for food contact, which due to its characteristics of transparency, resistance and gas barrier is particularly suitable for the production of containers and bottles.

|---|--|---|
|  PP-EVOH-PP | -20 °C / +130 °C |  |

O = ALTRI MATERIALI / OTHERS MATERIALS

PP-EVOH-PP – Polipropilene e internamente un copolimero dell'alcol vinilico (EVOH). Lo strato interno aumenta sensibilmente la barriera ai gas.
PP-EVOH-PP – Polypropylene and internally a copolymer of vinyl alcohol (EVOH). The inner layer significantly increases the gas barrier.

Dove siamo | *Where we are*

Via Decime Z.I., 28 E - 35019 Tombolo (Padova) Italy

COME RAGGIUNGERCI

In auto 🚗

All'uscita dalle principali arterie stradali, seguite le indicazioni per Cittadella. A ridosso della città nel comune di Tombolo si trova **HOTFORM**.

In treno 🚂

HOTFORM è raggiungibile attraverso la stazione di Padova che si trova sulla linea Roma-Firenze-Bologna-Venezia e sulla linea Venezia-Milano. Da Padova utilizzare un treno locale con fermata a Cittadella.

In aereo ✈️

HOTFORM dista 38 km dall'aeroporto di Treviso e 71 km dallo scalo internazionale "Marco Polo" di Venezia.

HOW TO REACH US

By car 🚗

At the exit of the main roads, follow the signs for Cittadella. **HOTFORM** is located near the city in the municipality of Tombolo.

By train 🚂

HOTFORM can be reached through the Padua station which is on the Rome-Florence-Bologna-Venice line and on the Venice-Milan line. From Padua use a local train with a stop at Cittadella.

By plane ✈️

HOTFORM is 38 km from Treviso airport and 71 km from Venice's "Marco Polo" international airport.
